IMPORTANT NOTICE TO VISA APPLICANTS CONCERNING VACINATION REQUIREMENTS

United States Immigration Law requires visa applicants to obtain certain vaccinations (listed below) prior to the issuance of a visa. Instructions and procedural guides panel physicians who conduct medical examinations to verify that applicants have met the new vaccination requirement, or that it is medically inappropriate for the visa applicant to receive one or more of the listed vaccinations: Mumps, Measles, Rubella, Polio, Tetanus and Diphtheria Toxoids, Pertussis, Influenza Type B (HIB), Hepatitis B, Varicella, Pneumococcal, and Influenza. In order to assist the panel physician, and to avoid delays in the processing of visa, all visa applicants should have their vaccination records available for the panel physician's review at the time of the medical examination. Visa applicants should consult with their regular health care provider to obtain a copy of their immunization record, if one is available. If you do not have a vaccination record, the panel physician will work with you to determine which vaccinations you may need to meet the requirement. Certain waivers of the vaccination requirement are available upon the recommendation of the panel physician.

Only a physician can determine which of the listed vaccinations are medically appropriate for you, given your age, medical history and current medical condition.

If you are fifteen (15) or older, a blood test for antibodies developed in response to infection by the Human Immunodeficiency Virus (HIV) is required. HIV is the virus that causes the Acquired Immune Deficiency Syndrome (AIDS). AIDS is the name given to a group of illnesses, which may occur in persons infected with HIV. HIV infection causes a defect in a person's natural immunity against disease. Victims are highly vulnerable to serious illnesses. This test is not to diagnose AIDS, but to detect antibodies to the virus. If the result is positive, it does not necessarily mean that you have AIDS or will get it. The results of your test will be provided to a consular officer. Also, it may be necessary to report results to the health authorities in this country. A positive test result will mean that you will not be eligible to receive a visa. A positive test result may also carry other consequences related to your day-to-day activities in this country.

POLICE CERTIFICATE

Police certificates are required for each visa applicant aged 16 years or older. Generally, application for such certificates should be made directly to police authorities in the district in which you resided. If an applicant over the age of 16 has lived in his/her country of nationality for 6 months or more, he/she must submit a police certificate from that locality. If the applicant lived in a different country for more than 12 months after the age of 16, he/she must also submit a police certificate from that country if police certificates are obtainable. If the applicant was arrested or convicted of a crime in a country, regardless of his/her age at the time the crime took place, or how long the applicant resided in that country, he/she must submit a police certificate from that country. The police certificate must cover the entire period of the applicant's residence in that area, and state what the appropriate police authorities records show concerning each applicant, including all arrests, the reason for the arrest(s), and the disposition of each case in which there is a record. Present and former residents of the United States should NOT obtain any police certificates covering their residence in the U.S. Turkish nationals should contact the closest "Cumhuriyet Savcılığı" (Public Prosecutor's Office) to obtain Turkish police certificates.

Do not attempt to obtain police certificates covering residence in any of the following countries, as they are not available:
